

FRANCIS VERNARD YAP

Cebu, Philippines | +63 956 453 1714 | yapfrancis555@gmail.com

PROFILE

Information Technology student with hands-on experience in full-stack web and application development. Skilled in building database-driven systems, REST APIs, and role-based applications, with strong front-end and back-end development, database management, and system integration experience.

EDUCATION

University of San Carlos Cebu City, Philippines

Bachelor of Science in Information Technology

University of Cebu – Banilad Campus Cebu City, Philippines

STEM Strand

CERTIFICATIONS & TRAINING

- CCNA: Switching, Routing, and Wireless Essentials — Cisco
- CCNA: Introduction to Networks — Cisco
- Intermediate SQL — DataCamp

TECHNICAL SKILLS

Languages · C, C#, PHP, Python, Java, SQL, JavaScript, TypeScript, HTML, CSS

Web Development · React, REST API Design, PDO, Bootstrap 5, Quill.js

Databases · MySQL, PostgreSQL, Supabase

Networking · Routing & Switching, Wireless Networking (CCNA)

Tools · Git, Excel/SheetJS, Flask, Ollama, Cisco Packet Tracer

EXPERIENCE

Full Stack Developer · Smart-Q IT and Engineering Solutions 2026

- Developed and maintained full-stack web applications, building responsive front-end interfaces and server-side functionality.
- Implemented database-driven features, CRUD operations, API integrations, and role-based workflows using PHP, JavaScript, HTML/CSS, and SQL.
- Collaborated on application testing, debugging, and deployment, improving usability, functionality, and system reliability.

PROJECTS

GSY Hardware – E-Commerce Platform · Personal Project 2026

- Built a full-featured online store for a hardware business using React (Vite), Tailwind CSS, and Supabase, enabling product browsing, shopping cart management, secure checkout, and order history tracking.
- Implemented role-based authentication with Row Level Security (RLS) to separate customer and admin permissions.
- Designed an admin dashboard for inventory management, order processing, and sales analytics.

Budget Tracker · Personal Project 2026

- Built a cross-platform personal finance app (Flutter/Dart) with Supabase for recording income and expenses, categorizing transactions, and tracking balances over time.
- Designed features for spending-habit tracking to help users stay organized and make informed financial decisions.
